

Baldwin Medical Centre

Wisconsin, USA

The Baldwin Area Medical Center (BAMC) in Wisconsin is a modern, 33 bed facility providing a vast array of services through over 20 visiting physicians.

In 1995 and again in 1996, the hospital was named in the top 100 hospitals in America.

Recently, BAMC decided to change the voice pagers carried by staff; as those used for communication between staff within the center were found to be both a drain on funds and increasingly unreliable.

After looking at Zetron as well as CommtechWireless solutions to their problem, BAMC chose the Commtech option for its lower cost and the responsiveness of the dealer – in this case USA Mobility.

The installation was a hands-off affair for the center: USA Mobility took care of the entire process with no interruptions to the smooth and efficient running of the center.

USA Mobility installed a MAXPage unit from CommtechWireless and a 100 watt transmitter in the facility, allowing the reliable transmission of critical messages throughout the entire center.

Expensive and unreliable pagers were replaced with competitively-priced and dependable alternatives from CommtechWireless – allowing more staff to carry pagers than ever before.

The system, now in place and providing BAMC with tremendous cost-efficiency, allows for the expansion of both the center and the solution itself if necessary.

At any time, BAMC can add more pagers to the system, upgrade their transmitter to allow for a second or extended site and add a BASEPage system to monitor their emergency alarms and communicate with staff.

From its proud beginnings to its bright future, Baldwin Area Medical Center has provided and continues to provide the kind of quality care that has made it among the nation's best.

Location: Wisconsin, USA

CommtechWireless is a world-leader in the supply of wireless communication solutions for the Healthcare, Hospitality, Emergency Services and Casino industries.
