EdTechSummitSA: UC-Wireless

The EdTech Summit South Africa (http://www.edtechsummitsouthafrica.com/) team has been able to do all the work that it has done because of the great Wi-Fi network that has been provided by UC-Wireless (http://www.uc-wireless.com/). UC-Wireless has been with us in all of our 6 EdTech Summits. Because of UC-Wireless, the EdTech Summit has been able to get all our devices (laptops & tablets) and all the people who attended our summits and their devices as well, connected to the internet.

UC-Wireless has shown, to many schools, that it is indeed possible and very affordable to have a

Wi-Fi network even in some of the most under-resourced schools and communities. We have been able to do most of our workshops because they made sure we stayed connected throughout every location that we held our summits. The EdTech Summit has shown people the resources that are in abundance over the internet. UC-Wireless has shown how easy it is to stay connected. UC-Wireless played a very important role in making sure the EdTech Summits were a success. The EdTech Summit and the team are very grateful for their tireless efforts in making sure that we stayed connected. The possibilities of what one can do, discover and learn when there is connectivity are endless.
