UC-Wireless – Supplier Profile

Posted on August 5, 2014 by Terri Chowles

UC-Wireless specialises in the distribution of integrated wireless communication systems with a complete offering for the Healthcare vertical. UC-Wireless solutions are certified integrations of middleware, wireless phones and communication consoles designed to facilitate effective time-critical communication and enhance efficiency through integration with other systems, allowing healthcare facilities to share patient information, stay notified and ensure staff safety.

With Head offices in Johannesburg, UC-Wireless has been operating throughout Africa since 2002 and recently the Middle East as the only distributor and supplier in the region of Spok (previously Amcom Software) wireless communication and middleware, Spectralink Enterprise Wi-Fi and DECT in-building wireless communication, Sagittar Carrier Grade Links and Ruckus Wireless Enterprise Wi-Fi.

Contribution to eHealth in SA

UC-Wireless's Fully Integrated solution offers healthcare providers a platform to run and connect systems and applications implemented (including all 3rd party systems) to manage processes and patients. Their solutions connect any IP or analogue PBX systems, Nurse Call systems, patient monitoring, and clinical, HR HVAC and BMS and Fire Alarm systems to deliver key information to the right people on their device of choice.

UC-Wireless is also one of the leading providers of "healthy Wi-Fi" technology, responding to the growing demand for Wi-Fi within hospitals and clinics to connect a multitude of medical devices, enable fast access to electronic patient records, improve staff communication and speed up the delivery of medical images and test results.
